

Quick
Facts

incadea.**fastfit**
service & tire solutions

Accelerate your
aftermarket business

incadea.fastfit, a global solution designed and developed to serve exclusively the needs of the tire business, vehicle accessories vendors and workshops, enables you to improve efficiency and productivity, while supporting the optimization of internal processes and procedures. The solution is based on the proven and innovative platform Microsoft Dynamics NAV and incorporates incadea's extensive knowledge and business process expertise of your industry.

■ Your industry. Embedded

The solution supports all key business functions, from financial accounting and order processing to stock management and includes many industry-specific add-ons to improve daily efficiency. incadea.fastfit includes vital business functionality such as the central shopping basket, the match code item search, contact search & management and services. Embedded focus on sales and purchase calculation helps in mapping standard industry condition schemes, while the item master, with more than 80.000 tires, rims, chafers and vehicle trade accessories, enables fast process optimization.

Data from various work processes can be efficiently recorded and used while dynamic data processing can save significant time. Information on various manufacturers, articles, work values, time allowed, fixed prices etc. is stored in comprehensive master tables. The solution includes e-commerce, knowledge management, and customer relationship management and is continually developed and enriched with new capabilities and functionalities in order to meet the industry needs and customer expectations.
